

Lab7:

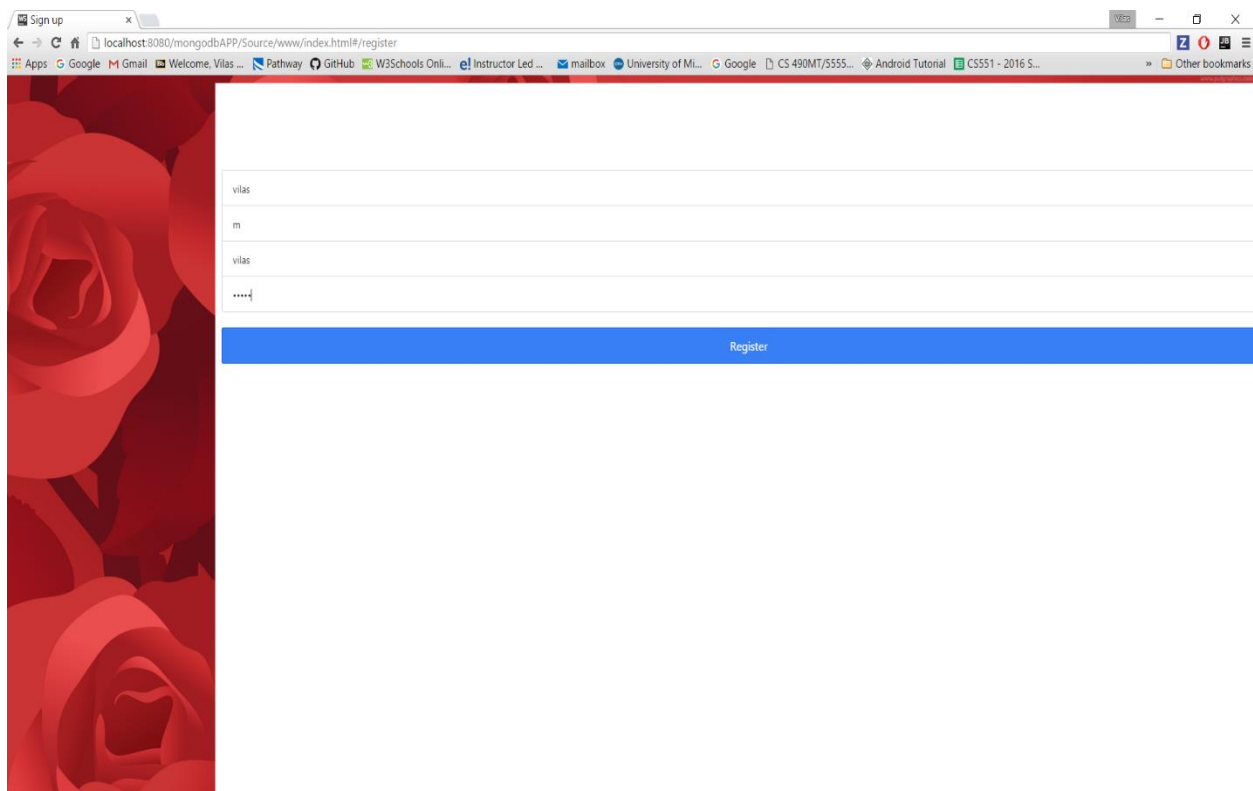

Main page:

First we need to register .we will do it by clicking signup button:

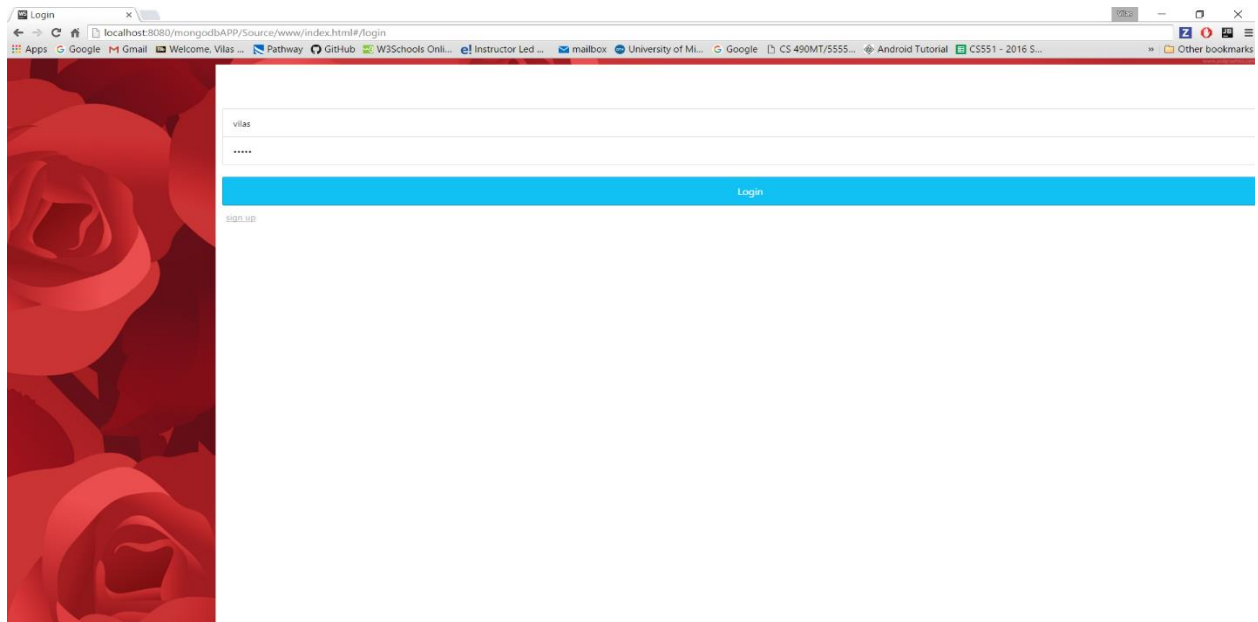

The screenshot shows a web browser window with the address bar displaying 'localhost:8080/mongodbAPP/Source/www/index.html#/login'. The page features a red rose background on the left side. The login form consists of two input fields: 'Username' and 'Password'. Below these fields is a blue button labeled 'Login'. At the bottom left of the form, there is a small link that says 'SIGN UP'.

It will display the below register page and you need to enter your details

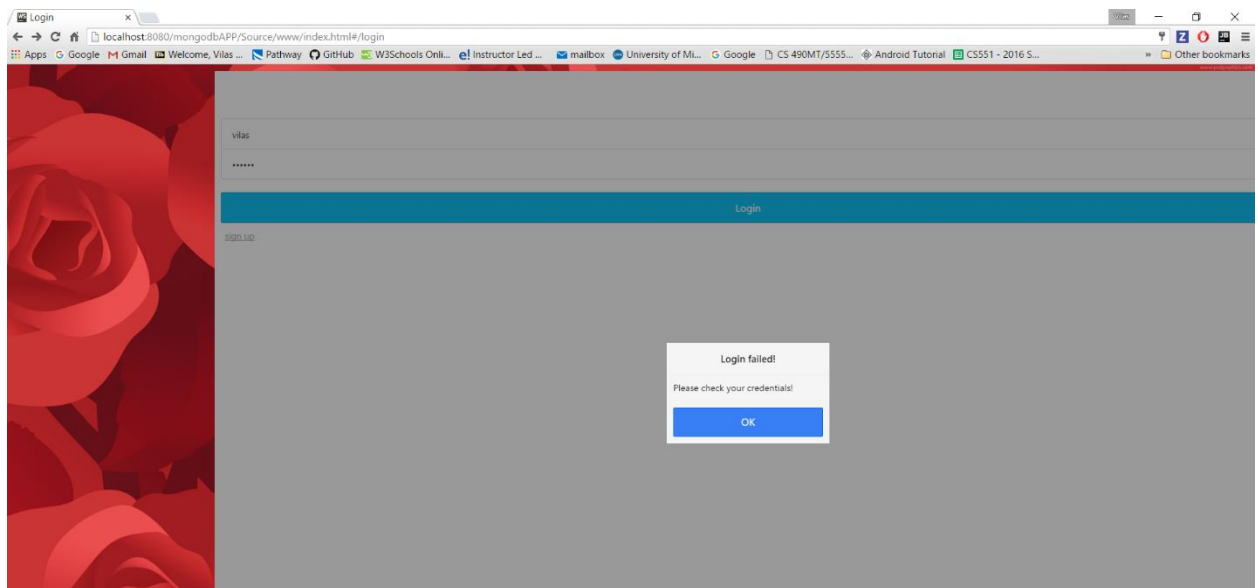

The screenshot shows a web browser window with the address bar displaying 'localhost:8080/mongodbAPP/Source/www/index.html#/register'. The page features a red rose background on the left side. The sign up form consists of four input fields: 'Name' (containing 'vilas'), 'Email' (containing 'm'), 'Password' (containing 'vilas'), and 'Confirm Password' (containing '****'). Below these fields is a blue button labeled 'Register'. At the bottom left of the form, there is a small link that says 'LOGIN'.

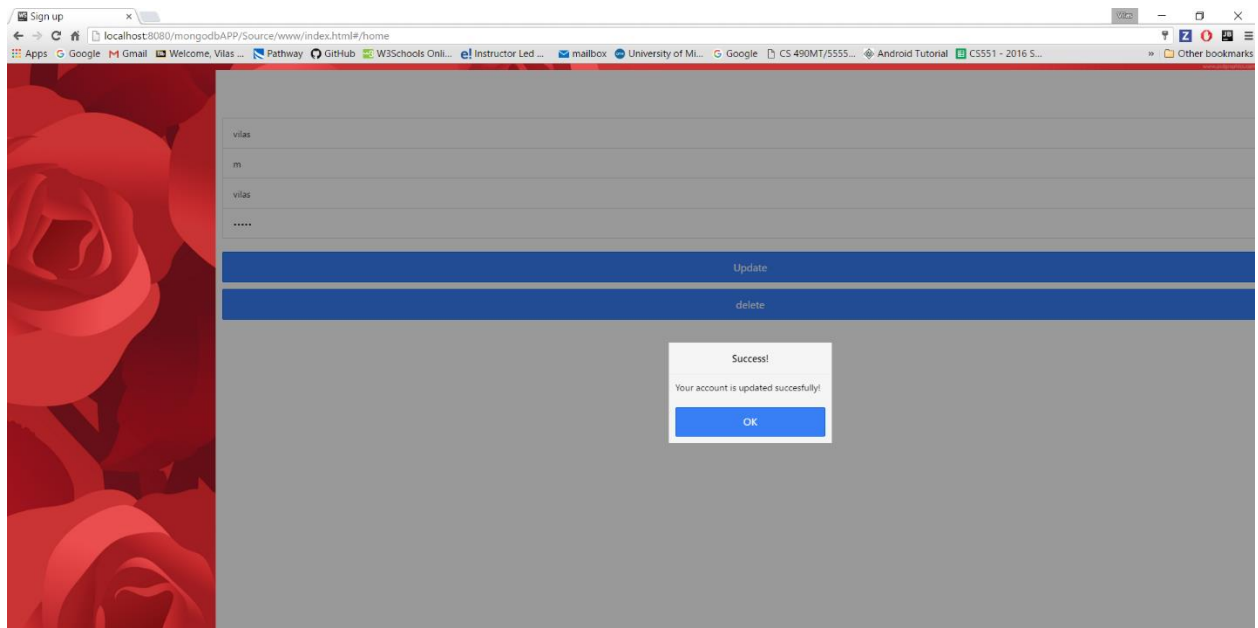

You can now use the same credentials to login

If you give wrong credentials it will throw the alert:

To update click on update button and you will see below output

To delete click on the below and you will see the deleted successfully alert
